

Columbia Gas of Ohio will soon be in your neighborhood. We are using enhanced GPS technology to record the location of our natural gas lines. This investment in safety will also improve our emergency response and maintenance of our facilities.

What does this mean for you?

- You may see Columbia Gas of Ohio vehicles, employees and contractors on your property.
- Our team will be surveying the main line along the street and the service line on your property up to the meter. They will be using light surveying and measuring equipment.
- The work will continue in your area throughout 2017.
- You may not be a Columbia Gas of Ohio customer, but your neighbor may be and we will still need to survey the area.
- Crews may need to return to your property for follow-up work.

Feel free to ask for identification from Columbia Gas of Ohio or one of our contractors:

- **Reconn**
- **Utiliquest LLC**
- **Woolpert**

Thank you for being a partner in safety!
